Your satisfaction is guaranteed. Many of our customers have told us that they receive a higher return from Argen than competitors. We are one of the few firms that make full disclosure of our assay results and are 100% honest. We have chemists onsite who assay the scrap on an ICP (Inductively Coupled Plasma) machine which is the most sophisticated equipment on the market. Further, we take our assay sample when the metal is molten which is when it is most homogenous. We take three different samples for each assay and we compare the results of all three. If all three results are not within our tight tolerance, we start the whole process again.

美国阿根致力于保证您的高满意度！许多我们的客户告诉我们，他们在阿根回收到的价值高于其他竞争对手。我们的分析结果完全透明且 **100%**的诚信。我们拥有多名高级化学分析师及目前市场上最先进的精炼分析设备-高级电感耦合等离子体光谱仪(ICP)。此外，我们分析样本时，是在金属充分均匀融化最一致时的液态下取三个不同的样本，并比较所有三个结果，如果三个结果不是我们在紧公差范围内，我们将会重新再提炼以确保您的回收取得最大利益。

We are confident you will be very satisfied with the results.
我们确信，您会有非常满意的结果。

Sincerely
